Navigation bar with links: Overview, Activity log, Access control (IAM), Tags, Diagnose and solve problems, Monitor, Resource visualizer, Connect, Bastion, Windows Admin Center, Networking, Settings, Availability + scale, Size, Availability + scaling, Security, Backup + disaster recovery, Operations, Monitoring, Automation, Help.

Native RDP configuration panel with fields for Source machine (Windows, 106.192.170.107), Destination VM (172.198.57.112, 3389), and connection prerequisites.

Remote Desktop Connection dialog box showing connection progress to 172.198.57.112:3389.

Try Windows Admin Center and Azure Arc today

Instead of Server Manager, you can use Azure Arc and the new Windows Admin Center built into the Azure portal to manage individual servers and clusters—on-premises and in Azure.

With Azure Arc you can secure and govern Windows Server at scale—on-premises and across clouds.

Get more info at aka.ms/Manage/WindowsServer

Or try Azure Arc: [Launch Setup](#)
